

Mobile dispenser

The mobile dispenser is installed on tank-truck to do mobile refueling service. Besides the vehicles, it can also realize refueling service for the equipment which can not move in some place, especially like in the field, mine, and construction site etc.

Features:

- Provide mobile refueling service
- Compact design for convenient operation
- Driven by power from pump of tank-truck.
- Flexible fuel application for gasoline, diesel, and kerosene etc.

Technical specification:

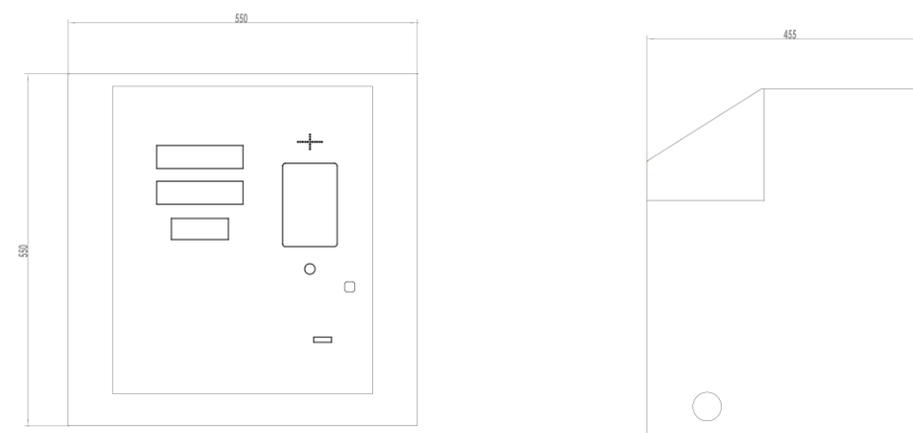

Accuracy for the unit	±0.25%
Flow rate	50L/min, 70L/min
Ambient temperature	-25°C ~ +55°C; or -45°C ~ +55°C
Relative humidity	20% - 95%
Unit noise rate	< 72dB (A);
Communication	With RS 485 port, or current loop
Power supply	DC 12V /24V
Digit of sale	0.00~99999.99
Digit of volume	0.00~9999.99
Digit of unit price	0.00~999.99
Totalizer of sale	0~99999999.99
Totalizer of volume	0~9999999.99

Basic Configurations:

- Main board, power board, display board, keypad, control board, low meter, solenoid valve, electromagnetic counter, filter, nozzle, hose, sight glass

Optional Configurations:

- Pump, motor, card reader payment, double swivel, printer, heater for ultra low temperature, breakaway coupling, standard electronics interface to POS and automation fuel management system

Model Range :

Model	Pump unit	Nozzle	Oil	Package Size (mm)
SK22ZF111A	Submersible pump	1	1	695*630*595
